

# CWE\_CAPEC User Experience Working Group

Friday, October 14, 2022

## Members in Attendance

Beatriz, Shadya

Christey, Steven

Coffin, Chris

Coles, Matthew

Foomany, Farbod

Gantenbein, Kirsten

Keane, John

Maldonado, Rosado

Nichols, Doug

Piazza, Rich

Roguski, Przemyslaw

Rothenberg, David

Schweiger, Andreas

Summers, Alec

Sundberg, Christopher

Taggart, Philip

Turkevich, Julia

## Introduction, Announcements, and Agenda

*MITRE CWE: Alec Summers*

- Topics:
  - User Story Presentation: Security Architect Workflows
  - Initial Overview of Content Development Platform
- Review of mission
- Report of activities at next board meeting TBD Q1-2023
- Working to identify further UEWG opportunities and priorities for FY23
- How can we continue to improve user experience and make CWE/CAPEC information more digestible?
- Next meeting December 14

## Security Architect User Story

*Sandia: Shadya Beatriz*

- Demo by Przemyslaw Roguski from Red Hat Poland
  - Get user stories across each persona (educators, technical writers, security researchers, analysts, etc)
  - Google doc collaboration document
    - Combined software and tool developers
    - Introduction to the user in each user story
    - Workflow example
  - A member asked in the case of a developer taking on the role of a security architect, would they fall under different personas throughout the day?
    - **Response:** There is some overlap between personas that we defined. User stories for different personas could be very similar.
  - A member asked if the presenter sees a functional difference in architects and designers for the purpose of this discussion?
    - **Discussion:** Discussion on being more specific, i.e. security architects versus security designers. This is the point of developing user stories, to determine what each persona needs to accomplish.

## CWE/CAPEC Content Development Platform

*MITRE CWE: Alec Summers*

- Goal – Modernize the program through direct community engagement
- Increase community content
- Where the in the process?
  - Content submission webform
  - Standardized email response
  - Development of scope exclusion documentation
  - Google Workspace
    - Repository for CWE/CAPEC development content
    - Provides transparency and ability to collaborate

## Closing Discussion

- Discussion of threat modelling as a use case to build out with user story
  - Other approaches will also identify
